

Varefakta Packaging

Collection and structuring of packaging data for extended producer responsibility made simple!

From 2025, an extended producer responsibility for all packaging is being introduced in Denmark. Companies importing or using packaging will be responsible for managing their packaging waste. Varefakta Packaging provides you with a system that easily and efficiently collects and processes your packaging quantities.

Here's how Varefakta Packaging works

1. Setting up suppliers and products
2. Supplier access and data input
3. Data validation
4. Report generation
5. Export to CSV.

- ✓ Full access to Varefakta Packaging
- ✓ Access for suppliers + supplier guidance
- ✓ Instructional videos and explainers where it might be challenging
- ✓ Webinars featuring insights and cases from others
- ✓ Access to our updates with news on legislation
- ✓ Purchase the support that suits you and pay only for what you need.
